Re: City of Stockton, Debtor, Case No. 12-32118 (CMK), Wells Fargo Bank, NA et.al. v. City of Stockton, California, ADV Case No. 13-2315

Gentlemen:

At your request, I considered various issues relating to the properties defined below in connection with the litigation involving Wells Fargo Bank, National Association, Franklin High Yield Tax-Free Income Fund, and Franklin California High Yield Municipal Fund (the "Plaintiffs") and the City of Stockton, California (the "Defendant" or "City"). My qualifications to perform this assignment, the scope of procedures performed, and my conclusions and opinions are included in this report. The effective date of my report is March 26, 2014.

The properties are more specifically defined as:

- Swenson Golf Course, located at 6803 Alexandria Place, Stockton, San Joaquin County, California ("Swenson").
- Van Buskirk Golf Course, located at 1740 Houston Avenue, Stockton, San Joaquin County, California ("Van Buskirk"). Van Buskirk includes the golf course and the Van Buskirk Community Center.
- Van Buskirk Community Center, located at 714 Houston Avenue, Stockton, San Joaquin County, California ("Community Center"). The Community Center has been separately evaluated from Van Buskirk.
- Oak Park, located on East Alpine Avenue between North Sutter Street. and Alvarado Avenue, Stockton, San Joaquin County, California ("Oak Park").

Collectively, Swenson, Van Buskirk, Community Center and Oak Park are referred to in this report as the "Properties", "Site", "Facility", "Subject Facilities" or "Subject Properties".

Qualifications to Perform the Assignment

I, Frederick Chin, am a principal and founder of the Atalon Management Group, a national real estate advisory firm. My firm's focus includes identifying and implementing value-enhancing solutions for under-performing, challenging and troubled real estate situations.

I graduated from the University of Arizona with a Bachelor of Science degree in finance and real estate in 1984. While attending courses at the University of Arizona, I also worked full-time as a real estate appraiser and market analyst. My college course work included classes on general real estate, real estate appraisal, real estate law, real estate finance, and real estate investment and taxation. I have also taken and completed a variety of real estate appraisal courses taught by the Appraisal Institute and its predecessor entity, the American Institute of Real Estate Appraisers. I am a member of the Appraisal Institute and was awarded the MAI designation in 1987, a designation I continue to hold today. I am also a member (by invitation only) of the Counselors of Real Estate and hold its CRE designation.

Since 1979, I have been engaged full-time in providing real estate consulting, advisory, research, due diligence, financial structuring, valuation, ownership, restructuring and operational turnaround services. Over my career, I have evaluated a variety of property types with varying ownership interests. I have also served in executive management roles as Chief Executive Officer ("CEO"), Chief Operating Officer ("COO"), and Chief Restructuring Officer of public and private companies, and have also held positions as Owner/Investor and Managing Partner of private real estate companies.

I am an expert at analyzing and valuing golf courses and recreational properties of varying sizes and prominence. Relevant to this report, I have evaluated and appraised more than 50 public and private golf courses throughout the United States. Over 20 of these golf courses were located in California. In addition to these prior engagements, I provided real estate consulting services to the former National Golf Properties ("NGP"); at the time, NGP was the largest golf course public Real Estate Investment Trust ("REIT"). NGP retained me to evaluate its portfolio of over 145 public (including municipal courses) and semi-private golf courses throughout the United States. My engagement with NGP included, among other things, golf course valuation matters, methodologies and analyses of historical and prospective operating performance and their effects on REIT performance, and analyses of potential operational improvements and efficiencies. My analyses and findings were presented to the board of directors of NGP. I have also owned and overseen the operations of 2 public and 1 private golf course, and was the CEO and COO of a private company that owned two public golf courses, which were located in Las Vegas, Nevada.

Over my career, I have testified as a real estate expert in deposition and/or trial on over 50 occasions. I have testified in bankruptcy courts in Florida, New Jersey, Arizona, Louisiana, Nevada and California, and in State Courts in Arizona, Nevada, Washington and California. I have never been precluded from providing expert testimony on real estate matters.

I have not published any articles, newsletters or books in the past 10 years. Over the past four years, I have not testified as an expert witness in real estate valuation matters.

My compensation is \$550 per hour. Travel time is billed at 50% of this hourly rate. My compensation for this assignment is not contingent on any outcome.

Scope of the Report and Conclusions

The focus of my report is the litigation between the Plaintiffs and the City. The issues I address in this report relate to:

1. The fair market value of a possessory interest in Swenson, Van Buskirk, the Community Center and Oak Park through each of September 1, 2038, September 1, 2048, and July 1, 2053, as well as perpetually.
2. Whether the amounts denominated as “rent” under that Lease Agreement (the “Lease Agreement”) between the City and the Stockton Public Financing Authority (the “Authority”) dated September 1, 2009, represented a fair market rent for the Properties and were related to the City’s use and occupancy of the Properties, in each case as of the execution date of the Lease Agreement.
3. The relevancy of the valuation conclusions reached in an appraisal of Swenson, Van Buskirk and Oak Park, as prepared by American Appraisal dated March 6, 2008, (“Appraisal Report”) and included and referenced in the Official Statement dated August 20, 2009 (“Official Statement”) for the Stockton Public Financing Authority Lease Revenue Bonds, 2009 Series A (Capital Improvement Projects) (the “Bonds”).
4. The fair market rental rate for the Properties as of the date of this report.

The facts and data I considered in preparing this report are identified on Exhibit A. I am also available to provide oral testimony to supplement my opinions and conclusions. I may review additional materials, including deposition testimony, reports and exhibits as they become available, and may render additional or rebuttal opinions.

As a result of the analyses performed, I formed the following conclusions:

1. Possessory Valuation Conclusions

The estimated fair market values of a possessory interest in each of the Subject Properties through various dates are as follows:

Property	As of March 26, 2014 (1)	As of March 26, 2014 (2)	As of March 26, 2014 (3)	As of March 26, 2014 (4)
Swenson	\$1,750,000	\$1,800,000	\$1,850,000	\$7,650,000
Van Buskirk*	\$2,425,000	\$2,525,000	\$2,625,000	\$5,375,000
Community Center	\$1,700,000	\$1,775,000	\$1,850,000	\$2,475,000
Oak Park	\$240,000	\$250,000	\$260,000	\$1,835,000

(1) Assumes possessory interest ends September 1, 2038

(2) Assumes possessory interest ends September 1, 2048

(3) Assumes possessory interest ends July 1, 2053

(4) Assumes possessory interest runs perpetually

* Includes golf course and Community Center

The marketing and exposure period for the Properties is estimated at 12 months.
The basis of my valuation estimates presumes cash transactions.

2. Contractual "Rent" Payment Conclusion

The amounts denominated as "rent" under the Lease Agreement did not represent a fair market rent for the Properties and were not related to the City's use and occupancy of the Properties as of the date of the Agreement. The Properties' historical financial performance indicates the Properties could have never supported the contractual rent established and owed under the leaseback agreement. The rent payable under the leaseback agreement was not in line or in no way related to the fair rental value (or the amount of rent that could have been paid) of the Properties at the time the lease was executed.

I understand that the City contends that, at the time that the Lease Agreement was executed in 2009, "the rent payable thereunder was commensurate with the fair rental value *to the City* of continuing to operate the" Properties. The City notes that it periodically considers the value to its citizenry of the City's services and facilities, "considering the cost of the services and the funds available to provide such services and facilities, determining which are essential or non-essential." This assertion has no basis

or relevancy for purposes of establishing “fair market rent”, as it is meaningless to any party other than the City.

Based on the above characteristics, the rent contained in the Lease Agreement was not a fair market rent at the time the agreement was executed in 2009.

3. Appraisal Report Conclusion

The valuations ascribed in the Appraisal Report of the Properties, dated March 6, 2008, and cited in the Official Statement dated August 20, 2009, are not reflective of market value and are stated as such that they are not market value. The Appraisal Report should not have been relied on or cited as a basis for loan underwriting. In the Official Statement, the City and its underwriters and advisors misstate and misuse the Appraisal Report findings for the Properties, and further mislead third party readers of the Official Statement by adding undisclosed land value estimates to the Appraisal Report findings. The Official Statement contains valuations that would mislead readers to believe that independent market valuations have been performed on the properties. The Official Statement’s use of the Appraisal Report is flawed, misleading and erroneous for any lending or extension of credit purpose.

4. Administrative Rent Conclusion

(a) The contract rent for the Properties from the bankruptcy petition date through June 30, 2014 is \$5,374,020.

(b) The current annual fair market rental rate for the Properties is \$300,000, calculated as follows.

Property	Occupancy Cost	Present Value - Possessory Interest Ending			Average Rent (Rounded)
		9/1/2038	9/1/2048	7/1/2053	
Swenson	\$117,019	\$138,000	\$124,800	\$123,600	\$126,000
Van Buskirk	\$53,834	\$57,180	\$52,020	\$51,780	\$54,000
Community Center	N/A	\$133,920	\$123,120	\$123,600	\$127,000
Oak Park	\$48,709	\$18,900	\$17,280	\$17,280	\$26,000
Total Rent	\$219,561	\$348,000	\$317,220	\$316,260	\$300,000

Procedures I Performed:

- Inspected the Properties;
- Reviewed the underlying Site and Facility Lease between the City and the Authority dated

September 1, 2009 (the “Nominal Lease”);

- Reviewed the Lease Agreement;
- Reviewed various correspondence, reports and financial information regarding the Properties produced in discovery by the City and its agents;
- Considered deposition testimony of City employees and consultants;
- Gathered and analyzed market information;
- Considered the marketability of possessory interests in the Properties;
- Formulated various valuation opinions regarding the Properties. Valuations have been presented in the form of a summary appraisal report, which is intended to comply with the reporting requirements set forth under Standards Rule 2-2 of Uniform Standards of Professional Appraisal Practice (“USPAP”). This report format, plus any work papers and oral testimony I may provide, incorporates a summary explanation of the data, reasoning and analysis that were used to develop the opinions of value.

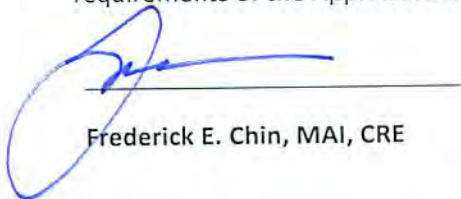

Underlying Assumptions Material to the Possessory interest Conclusions

1. Plaintiff (or assignees) will hold a possessory interest in the Properties through either September 1, 2038, September 1, 2048, July 1, 2053, or perpetually.
2. The Lease Agreement is assumed to be terminated as of the date of valuation.
3. The possessory interest in the Properties can be segregated, allocated and held by different entities.
4. The Properties can be used and operated by entities other than the City.

CERTIFICATE OF APPRAISAL

I certify, to the best of my knowledge and belief, to the following:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- I have not previously appraised or provided professional appraisal services on the Properties.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice of the Appraisal Foundation.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice.
- I have made personal inspection of the Properties.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- Mark Kemper and Evan Forrest provided significant real property research assistance to the person signing this certification.
- As of the date of this report, Frederick Chin has completed the continuing education requirements of the Appraisal Institute.

Frederick E. Chin, MAI, CRE

VALUATION METHODOLOGY

The three traditional approaches to value (Cost, Income and Sales Comparison) were considered to estimate the fair market value of a possessory interest in the Subject Properties. The applicability and relevancy of each valuation approach depends on the specific characteristics of the Properties, including: 1) age of improvements; 2) condition and functionality of the improvements relative to market competition; 3) the historical, current and anticipated demand of the improvements relative to the market; 4) their highest and best use as improved; 5) the length of the possessory interest; and 6) the nature of the possessory interest to be appraised. Each of these characteristics has material impacts on the value of a possessory interest in the Properties. Additionally, in the case of each of the Properties with a defined possessory interest ownership period and specific to the Cost Approach (where applicable), land value has been excluded. In the case of the valuation of a possessory interest perpetually, land value has been estimated for Swenson, Van Buskirk and Oak Park.

SWENSON AND VAN BUSKIRK

Swenson and Van Buskirk do not have significant building improvements relative to the overall property size. Additionally, most of the improvements are over 30 years old, and both building and site golf course improvements are in need of renovation, upgrading and additional capital improvements to enhance their appeal and marketability. As such, the building improvements suffer from substantial physical and functional obsolescence. Thus, the Cost Approach is not deemed to be relevant to estimate the possessory interest of these properties.

The Income Approach was applied to the golf courses. Historically, since at least 2006, the subject golf courses have under-performed financially under the City's ownership and have experienced a consistent pattern of net operating losses before any payments specified in the Lease Agreement. The net operating losses reflect the economic and competitive market conditions affecting the Stockton market, needed repairs and capital investments to the existing improvements and other ownership, operating and marketing challenges. However, despite the golf courses' recent financial history, improvements to their revenue production are possible. During 2011, the City engaged an external third party golf consultant to review and consider options for future golf course operations. The consultant's golf report made financial projections regarding the golf courses' economic potential, presuming that a number of capital improvements and changes in operations would be implemented. I have read these third party reports and concur that the possibility exists to enhance the revenue production of the golf courses, presuming ownership and management implemented a number of changes. Additionally, I have reviewed financial projections prepared by KemperSports, the current manager of Swenson and Van Buskirk. I have considered KemperSports' and the consultant's projections, and for valuation purposes, applied an income capitalization method that would be

VALUATION METHODOLOGY

used by prospective purchasers of troubled golf courses to indicate value ranges for a possessory interest in the courses for specified periods of time.

The Sales Comparison Approach was also used. This approach is considered the best indicator of value for the subject golf courses, as there have been a significant number of public golf courses that have sold throughout the United States, including a number of sales in California. The sales have similar characteristics to the Properties (except that they typically involved the sale of fee simple interests). These sales were purchased by private entities that frequently make additional investments in a golf course after consummation to enhance and improve their earning potential. Based on my research, the sales demonstrate meaningful units of comparison to assist in my estimation of value for the golf courses.

OAK PARK

In the case of Oak Park, while the improvements on the property are material in size and stature (namely the baseball stadium, senior center and ice rink), the improvements are old (most ranging from 44 to 65 years old) and suffer from significant deferred maintenance (in particular, the senior center and ice rink). Additionally, these particular facilities are specialized in use. As such, there is a considerable amount of functional obsolescence inherent in the improvements. Furthermore, given their specialized use, any competition in the marketplace that offers a more modern and functional, newer set of amenities, would negatively impact the value of the improvements. From all these regards, the improvements suffer from all forms of depreciation – physical, functional and external. Depreciation is hard to estimate given that all three forms exist. Thus, the Cost Approach was not used.

The Income Approach is not feasible to perform, as the property serves as a public use for the benefit of the community and has not been operated with an express intent to maximize revenue. Frequently, such uses generate operating losses that are consolidated with and handled as a part of a municipality's operating budget. For the past three years, the City estimates that the operating deficits for Oak Park aggregated approximately \$843,000. The improvements serve a public use, and their existence is not based on their income producing capability.

The Sales Comparison approach has been used to estimate market value. Although many other improvements exist on the Oak Park site – baseball stadium, baseball/softball fields, tennis courts, a swimming pool complex and senior center - the contributory values of these other improvements are minimal because they are very specialized improvements with significant deferred maintenance. Of the improvements at Oak Park, the ice rink facility has the most value under its existing use. Fee simple sales of ice rinks were gathered for comparison

VALUATION METHODOLOGY

purposes. Although no sale matched the improvements, location, condition and situation of the ice rink at Oak Park, the sales provided meaningful units of comparison to assist in my estimation of value for this facility.

COMMUNITY CENTER

The Community Center is a portion of Van Buskirk and has been separately delineated for valuation purposes. Originally built in the 1960's, the improvements were completely renovated and expanded in 2007 and configured for the express purpose as a local-serving community center. Specific to a community center use, the improvements are functional and given their age and fairly recent renovation, the improvements do not suffer from material functional obsolescence and only some physical deferred maintenance/depreciation. In this instance, the Cost Approach is given considerable weight.

The Income Approach is not considered a relevant approach to value, as the current use of the property is typically for public/community purposes and not for its income-producing ability.

The Sale Comparison Approach was not used, as the subject facility is purpose built for the City.

POSSESSORY INTEREST

The Properties are subject to the Nominal Lease, which permits possession and use of the Properties for an extended period of time for nominal rent. At the end of the term (as it may be extended), the possession of the Properties reverts to the City. The possessory interest created by the Nominal Lease is similar to a leasehold interest in the Properties. As such, my estimated values of the possessory interest reflect the amount a willing lessee would pay to a willing lessor, as of the date of analysis, for the right to use the Properties for specific periods of time. Once in possession, such lessee would then devise ways to efficiently, effectively and profitably manage and operate the Properties, while undertaking the time, effort and risk to hold the possessory position, as well as recapture its initial investment.

The Nominal Lease conditionally terminates on September 1, 2038. However, the Nominal Lease provides that, "[i]f, on September 1, 2038, the aggregate amount of Lease Payments (as defined in and as payable under the Lease Agreement) shall not have been paid, or provision shall not have been made for their payment, then the term of this [Nominal] Lease shall be extended until such Lease Payments shall be fully paid or provision made for such payment." I understand that, as part of the settlements to be implemented pursuant to the City's proposed plan for the adjustment of debts, the City has agreed to restructured debt obligations with terms that extend as far as July 1, 2053. As a result of the foregoing, I have been asked to value the possessory interest through four points in time: September 1, 2038 (the conditional

VALUATION METHODOLOGY

termination date of the Nominal Lease), September 1, 2048 (ten years after the conditional termination date of the Nominal Lease), July 1, 2053 (the last date of the City's restructured debt obligations), and perpetually (the result that would occur if the City is unable to make all "Lease Payments" as provided for in the Nominal Lease). The first three periods have a finite end date, which would materially deter a lessee's ability to improve or redevelop the Properties to higher, better and more productive uses. In the case of a possessory interest perpetually, this interest is similar to fee simple ownership whereby a lessee would consider changing the use (re-zoning) to higher and better uses, likely as residential/mixed use residential and commercial. In any event, because of the limited periods of possession (as of 2038, 2048 and 2053) of the Nominal Lease, a change of use and subsequent redevelopment of the property with higher and better uses is risky (*e.g.*, the City and/or other governmental agencies could impose significant conditions that could deter economic feasibility, or could deny a rezoning of the Property) and in the instances with finite possessory dates, not likely economically feasible. The possessory interest with defined time periods also presents inherent challenges to the owner, as the possessory interest makes it difficult for a lessee to secure traditional financing. Prospective lenders would likely restrict the amount and timing of funds to improve, redevelop or re-use the property because of the ultimate reversion of those improvements to the City at the end of the term (except in the case of a possessory interest perpetually). A possessory interest with finite dates also challenges an owner due to the aging of the improvements and their need for increased capital expenditures. The existence of the Nominal Lease may also preclude potential tenants and sub-lessees of a redeveloped property.

The limitations created by the temporal nature of the Nominal Lease significantly and negatively impact fee simple value estimates in the Properties. This negative impact is exacerbated by the poor recent historical financial performance/negative operating losses of the Properties, in particular at Van Buskirk and Oak Park. Thus, a substantial discount exists relative to fee simple values. The discount applied is similar to the same concept as the discount for a partial, partnership or fractional interest in real estate. The amount of discount varies, depending on the length of the period of possession and whether sufficient demand exists to yield profitable operations for the Properties. In general, the discount is considerably less for Swenson than Van Buskirk, and significantly more for Oak Park than Van Buskirk.

Under the presumption that the possessory interest is perpetual, the negative impacts noted above are no longer applicable, as this particular interest is similar to a fee interest. A holder of a possessory interest perpetually does not face the same challenges and constraints related to financing, redeveloping and changing the use of the Properties. The highest and best use of the Properties is different as if in fee than if there are time period constraints of a possessory interest. It is reasonably probable, physically possible and economically feasible that the

VALUATION METHODOLOGY

Properties could be converted into residential, commercial or mixed-uses. A change of use would have to occur, which I believe would be possible at some time during the possessory period perpetually. Indeed, given that the City would face the prospect of not obtaining possession of the Properties, it is highly likely that the City would facilitate a value-maximizing change in use, as the City rationally would desire for the Properties to be used in a way that maximizes taxes and other revenues for the City.

The valuation approach of the Properties with a possessory interest perpetually is different than with the presumption that there are time limitations of the possessory interest. In my opinion, the value of the Properties is land value, with the existing improvements considered to be interim uses until such time as a change of use can be achieved, as market conditions dictate, and when the existing improvements no longer can achieve material revenue production. I have used the sales of vacant land to estimate the Properties' value presuming a possessory interest perpetually.

DEFINITIONS

Fair Market Value: The most probable price that the specified property interest should sell for in a competitive market after a reasonable exposure time, as of a specified date, in cash, or in terms equivalent to cash, under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, for self-interest, and assuming that neither is under duress. (Source: *The Appraisal of Real Estate, 13th Edition.*)

Possessory Interest: 1) The present right to control property, including the right to exclude others, by a person who is not necessarily the owner. 2) A present or future right to the exclusive use and possession of property. (Source: *Black's Law Dictionary Ninth Edition, 2009*)

Fee Simple Estate: Absolute ownership of real property; owner entitled to the entire property with unconditional power of disposition during the owner's life, and upon death the property descends to the owner's heirs. (Source: *Dictionary of Real Estate Terms, Eighth Edition, Jack P. Friedman*)

Leased Fee Estate: An ownership interest held by a landlord with the right of use and occupancy conveyed by lease to others. The rights of the lessor (the leased fee owner) and the leased fee are specified by contract terms contained within the lease. (Source: *Dictionary of Real Estate Appraisal, Third Edition, Appraisal Institute*)

Leasehold Estate: The interest held by the lessee (the tenant or renter) through a lease conveying the rights of use and occupancy for a stated term under certain conditions. (Source: *Dictionary of Real Estate Appraisal, Third Edition, Appraisal Institute*)

Marketing Period: The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market. (Source: *The Dictionary of Real Estate, 5th Edition*)

Exposure Period: The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based on an analysis of past events assuming a competitive and open market. (Source: *The Dictionary of Real Estate, 5th Edition*)

DEFINITIONS

Highest and Best Use: The legally, financially, and physically possible use that, at the time of the appraisal, is most likely to produce the greatest net return to the land and/or buildings over a given period. May be applied to property as if vacant or as improved. (*Source: The Dictionary of Real Estate, 5th Edition*)

NOMINAL LEASE AGREEMENT

As of the date of analysis, the Properties were subject to two agreements. The first agreement involved the City as “lessor”, and the Authority as “lessee”, evidenced by the Nominal Lease dated September 1, 2009. Concurrently, a sub-interest was created with the Authority as “sub-lessor”, and the City as “sub-lessee”, evidenced by the Lease Agreement dated September 1, 2009.

The Nominal Lease and Lease Agreement do not separately segregate or allocate the rent payable or other monetary or other aspects of the Swenson, Van Buskirk and Oak Park Properties. All three Properties are subject to these agreements.

Presently, there are various disputes involving the Subject Properties; for purposes of this report, it is assumed that only the Nominal Lease exists and that the Authority may assign its possessory interest in the Subject Properties to one or more unrelated third parties, who are assumed to accept the Subject Properties subject to the original terms of the Nominal Lease.

The Lease Agreement is assumed to be terminated as of the date of my analysis.

A summary of the Nominal Lease follows:

Nominal Lease Agreement Summary

- The Nominal Lease between the City and the Authority includes the following parcels of real property:
 - Oak Park Site
 - Swenson Golf Course
 - Van Buskirk Golf Course & Community Center
- The Nominal Lease commenced on September 1, 2009 and shall end on September 1, 2038, unless extended or terminated sooner.
- Rent of one dollar (\$1.00) was paid by the Authority and covers the entire term.
- The Authority shall use the site and facility solely for the purpose of leasing the site and facility to the City, except in the event of a default the Authority and its assigns may exercise the remedies provided in the Lease Agreement (including the right to possess and re-let the Properties).
- The City has the right to enter the site and facility at any reasonable time to inspect and make repair or improvements.
- Upon termination, the site and facility shall be returned to the City in good order and condition, reasonable wear and tear excepted.
- Any permanent improvements and structures existing at the time of the termination shall vest in the City.
- The City covenants and agrees to pay any and all assessments of any kind and all taxes.

ECONOMIC OVERVIEW

The Subject Properties are located in Stockton, California. Stockton is the county seat for San Joaquin County, located roughly 90 miles east of San Francisco and 45 miles south of Sacramento. Stockton was incorporated in 1850 resulting from the 'Gold Rush' in California but transformed into an agriculturally based economy. Stockton is located along a channel heading into the Port of Stockton which results in Stockton being a shipping point for Northern California along the San Joaquin Delta. (Source: [City of Stockton website](#)). For purposes of this section, the Stockton MSA is comprised of San Joaquin County according to the State of California Employment Development Department.

ECONOMIC OVERVIEW

According to the City of Stockton Annual Comprehensive Report 2012 (note that the City limits are smaller than the Stockton MSA), the largest employers in the City are:

Employer	Employees	Percent of Total City Employment
San Joaquin County	6,500	5.16%
Stockton Unified School District	3,893	3.09%
St. Joseph's Medical Center	2,500	1.99%
O-G Packing Company	2,000	1.59%
City of Stockton	1,683	1.34%
Diamond Walnut	1,407	1.12%
Dameron Hospital	1,200	0.95%
Pacific Gas and Electric	1,100	0.87%
Kaiser Permanente	1,065	0.85%
University of Pacific	1,000	0.79%

The Stockton market appears to be improving from a precipitous decline in employment and the downturn of the economy. Key economic statistics show improvement. The economic information below is from the University of Pacific's quarterly release based on Stockton MSA data.

- Per the University of Pacific, estimates of non-farm employment in the Stockton MSA is expected to increase 3.7% in 2014.
 - Trade, Transportation, and Utilities represent 26.5% of the total employment base and it is projected to have an average growth rate of 1.9% from 2014 – 2018.
 - Construction & Mining and State & Local Government are expected to lead the job growth in 2014 with 7.1% and 7.3% increases, respectively, representing 21.1% of the total employment base.
 - Construction & Mining is expected to grow at an average annual rate of 8.2% from 2014 - 2018, representing the largest growth rate for the area.

ECONOMIC OVERVIEW

- Federal Government and Information are expected to see the largest decreases in employment in 2014 at 2.8% and 0.1%. Government represents 2.7% of the total employment base.
- Unemployment peaked in the 4th quarter of 2010 at 17.6%, but has steadily decreased to 12.2% in 4th quarter of 2013.
- Government entities are the largest employers in the Stockton area. Since 2010, around 1,600 more employees were added totaling 34,300 in Q4 2013, but less than when peak employment in Q1 2008 of 36,700.
- Personal income has rebounded from negative changes since 2009 to 16 straight quarters of positive gains thru the end of 2013. Personal income has increased \$3,400 over the past four years.
- Wages contracted in 2013 but are projected to grow 14% total thru 2018.
- Per capita income hit a trough in 2010 at \$27,700, but has grown each year to \$28,600 in 2013, just below the peak of \$29,400 in 2007.
- Housing starts reached a trough in the 4th quarter of 2011 but are expected to demonstrate consistent additions, with new starts up 28.5% yearly through 2018.
- Further growth is expected from the Gross Metro Product at an annual rate of 3.5% thru 2018 with 3.6% growth projected in 2014 over 2013.

The Stockton housing market also appears to be improving. According to information from the website Zillow, Stockton housing prices increased from their trough of around \$120,000 in late 2010 to just over \$170,000 at the beginning of 2014, an increase of almost 40%. This rate of change is one of the highest in the country. Additionally, foreclosures peaked in 2008/09 but have been trending down each year since.

GOLF COURSE VALUATION INCOME APPROACH

The Income Approach was applied to Swenson and Van Buskirk. This approach is based on the assumption that value is created by the expectation of economic benefits to be derived in the future. Although recent historical performance (since 2006) has shown a consistent pattern of net operating losses, I believe privatization of the course and implementation of a new business model can yield improved financial results. To assess the income-producing capabilities of Swenson and Van Buskirk, I reviewed golf course profit and loss statements from 2008-09 through 2012/13, and future projections for 2013/14 through 2015/16, prepared by the current golf course manager, KemperSports. Below is a summary of the financial information.

	Actuals					Projected	Projected	Projected
	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16
Swenson								
Revenue	\$1,200,691	\$1,100,822	\$1,105,653	\$1,193,345	\$1,170,185	\$1,145,334	\$1,443,488	\$1,484,525
Expense	\$1,279,683	\$1,261,639	\$1,200,705	\$1,290,843	\$1,339,864	\$1,271,624	\$1,390,398	\$1,419,235
Net Income (Loss)	(\$78,992)	(\$160,817)	(\$95,052)	(\$97,498)	(\$169,679)	(\$126,290)	\$53,090	\$65,290
Van Buskirk								
Revenue	\$549,882	\$569,477	\$531,837	\$576,148	\$538,337	\$548,045	\$700,640	\$724,350
Expense	\$831,771	\$846,462	\$802,663	\$754,091	\$704,000	\$763,339	\$830,177	\$843,708
Net Income (Loss)	(\$281,889)	(\$276,985)	(\$270,826)	(\$177,943)	(\$165,663)	(\$215,294)	(\$129,537)	(\$119,358)

Note: Financial information and projections from KemperSports

In 2011/12 a onetime termination fee of \$100,000 was paid to Valley Crest, Inc. for early termination of a maintenance contract with Swenson and Van Buskirk. The maintenance contract was terminated due to the selection of KemperSports as the new course manager for Swenson and Van Buskirk. Under the management agreement, KemperSports is paid a management fee and is eligible for a bonus based on their ability to increasing revenue. The bonus is payable regardless of whether the courses make a profit. Additionally, the City allocates approximately \$75,000 in City employee salaries to the golf courses.

During 2011, the City also engaged an external third party golf consultant (the "Golf Consultant") to analyze the golf courses and make certain recommendations. I reviewed the Golf Consultant's 2011 golf report which provides financial projections and recommendations relating to the ongoing management and operations of the courses. Below is a summary of the Golf Consultant's financial projections.

GOLF COURSE VALUATION INCOME APPROACH

Combined Golf Courses	FY2011-12	FY2012-13	FY2013-14	FY2014-15	FY2015-16
Revenues	\$2,185,684	\$2,455,916	\$2,638,840	\$2,692,927	\$2,753,558
Expenditures	\$2,262,686	\$2,275,559	\$2,358,673	\$2,394,144	\$2,430,016
Net Annual Activity	(\$77,002)	\$180,357	\$280,167	\$298,783	\$323,542
Other Contract Costs					
Management Fees	\$146,063	\$163,174	\$176,029	\$182,552	\$189,518
Unanticipated/Emergency Costs	\$40,000	\$46,500	\$48,825	\$48,825	\$45,000
Additional Contract Costs (ACC)	\$186,063	\$209,674	\$224,854	\$231,377	\$234,518
Net Annual Activity less ACC	(\$263,065)	(\$29,317)	\$55,313	\$67,406	\$89,024

Source: Golf consultant, John Delorenzo's golf operations powerpoint presentation dated May 24, 2011.

In the Golf Consultant's opinion, to achieve enhanced financial performance, an owner must make significant capital investments in Swenson and Van Buskirk. Some changes recommended by the Golf Consultant included increasing rates, making modifications to pass play, reducing free play, adding cart paths, making certain capital improvements and increasing marketing efforts. Many more improvements and investments are necessary to materially enhance performance; a competent owner with professional management would make these improvements.

I independently determined that golf course rates at the Properties could be increased, based on my inspection of comparable golf courses in Stockton. I compared and contrasted other golf courses to Swenson and Van Buskirk to assess potential areas of improvement, similar to what the Golf Consultant did. My analysis included a quantitative ranking system (on a 1-5 scale) to evaluate different aspects of each course with 1 being poor and 5 being excellent. Below is a chart with my observations.

For the same courses evaluated on above, round rates were assessed and compared to Swenson and Van Buskirk. Based on my overall ratings, it appears that round rates at Swenson and Van Buskirk are below the rates of comparable courses in the Stockton market and could be increased.

I concur with the Golf Consultant that the possibility exists to enhance the revenue production of the golf courses.

To estimate the value of a possessory interest in Swenson and Van Buskirk, I have considered both the KemperSports and Golf Consultant's revenue projections and have applied the gross income multiplier ("GIM") income capitalization method. While other income capitalization methods are available (discounted cash flows and direct capitalization), Swenson and Van Buskirk have experienced net operating losses in the recent past which prohibit the use of these other methods. Capital and operational improvements are also needed at both Swenson and Van Buskirk to maximize value.

The GIM method is appropriate to use in the case of Swenson and Van Buskirk as it takes into account, in one single ratio, all the factors that market participants consider in pricing properties. It's also one method commonly employed to convert gross income to value for properties which have experienced persistent declines in revenues and weak or negative margins. According to the Society of Golf Appraisers ("SGA") 2014 Financing & Investing Survey, a number of buyers and sellers give credence as to the relevancy of the GIM approach. The survey information indicate GIM's generally in the .9 to 1.3X range for clubs with nominal or negative net margins. The SGA survey indicated that the average GIM for all clubs was 1.4x gross income.

The survey information is also corroborated with listings for sale of golf courses around the country. I have gathered 31 golf course listings of public, semi-private and private golf courses. Current listing prices reflect GIMs that commonly range from .77 to 1.77. Many of the listed

GOLF COURSE VALUATION INCOME APPROACH

courses also are under-performing, whereby net operating incomes are negative, and whereby revenue enhancements and other operating improvements would likely be implemented after closing.

Historically, the number of rounds played annually and the average revenue per round (including golf, food and beverage and revenue from other sources) has varied, reflected on the following table.

	<u>2008/09</u>	<u>2009/10</u>	<u>2010/11</u>	<u>2011/12</u>	<u>2012/13</u>
Swenson					
Revenue	\$1,200,691	\$1,100,822	\$1,105,653	\$1,193,345	\$1,170,185
Rounds Played	55,864	57,637	53,450	59,669	54,492
Avg Price Per Round	\$21.49	\$19.10	\$20.69	\$20.00	\$21.47
Van Buskirk					
Revenue	\$549,882	\$569,477	\$531,837	\$576,148	\$538,337
Rounds Played	27,095	29,830	24,300	27,047	24,316
Avg Price Per Round	\$20.29	\$19.09	\$21.89	\$21.30	\$22.14

Note: Approximately 20% to 25% of total rounds are member or discounted for youth programs.

Source: Revenue figures from KemperSports. Rounds played figures from Susan Wren.

Based on my analysis of competitor rates, the past performance of the courses, and the enhancements in revenues that could be made, I project the courses could achieve the following revenues:

Course	Estimated Annual Rounds (Projected)	Average Revenue per Round (All Sources)	Annual Gross Potential Revenues
Swenson	56,000	\$24.00	\$1,344,000
Van Buskirk	26,000	\$23.50	\$611,000

Applying the GIMs to the revenue projections, the indicated value ranges are as follows:

Swenson (Projection):

- Potential Gross Income (2014-15) \$1,344,000 times 1.3 to 1.5 = \$1,747,000 to \$2,016,000; rounded to \$1,900,000

Van Buskirk (Projection):

- Potential Gross Income (2014-15) \$611,000 times 1.1 to 1.35 = \$672,000 to \$825,000; rounded to \$800,000

GOLF COURSE VALUATION SALES COMPARISON APPROACH

Sales of golf courses throughout the country were collected and reviewed. Since 2011, there were 719 golf course sales (source: National Golf Foundation). Of the 719 sales, 537 were private facility courses, 163 were daily fee, and 19 were municipal facilities. Furthermore, there were 36 golf course sales (6 were private courses, and 30 were daily fee courses) that occurred in California.

The public golf course sales demonstrated patterns in price per hole that is useful for comparing to Swenson and Van Buskirk. While the locations of the golf course sales differ (some are located in more populated metropolitan areas, are located in neighborhoods with higher rate potential, are newer, have different appeal (USGA rankings, clubhouse improvements, course length)), and are different in condition/needed improvements, the price per hole ranged from \$72,222 to \$150,222, and per acre from \$5,847 to \$23,148.

GOLF COURSE VALUATION SALES COMPARISON APPROACH

As mentioned previously, I have also gathered listings of golf courses available for purchase. While these listings do not reflect consummated sales, they do provide additional supporting information. In general, non-Hawaii courses range in listed price per hole from \$64,815 to \$194,444 (average \$117,670 per hole for public courses), and from \$6,064 to \$35,000 per acre (average of \$12,224). These asking prices are certainly within the range of my overall sales database.

Based on the various similarities and differences of Swenson and Van Buskirk, I have estimated the following values presuming a fee simple ownership interest and before discounting for possessory interests:

Swenson: \$100,000 to \$110,000 per hole (for 18 holes – the 9-hole executive course is considered in this estimate); \$8,000 to \$10,000 per acre; indicated value range: \$1.806 million to \$2.186 million, rounded to \$2,000,000

Van Buskirk – Golf Course only: \$60,000 to \$70,000 per hole; \$5,000 to \$6,000 per acre; indicated value range: \$1.08 million to \$1.358 million, rounded to \$1,100,000

GOLF COURSE RECONCILIATION OF VALUES

The Income and Sales Approaches were used to indicate values for the golf courses. The fee simple interest indicated values from each approach are as follows:

Property	Income Approach	Sales Approach	Reconciled Value (Assumes Fee Simple Ownership)
Swenson	\$1,900,000	\$2,000,000	\$1,950,000
Van Buskirk	\$800,000	\$1,100,000	\$900,000

As indicated previously, the possessory interests are discounted from the fee simple values. The discounts are attributable to: 1) difficulty of obtaining financing to help defray capital investments necessary to enhance performance; 2) the financial operating history of the Properties that have reflected consistent years of financial losses; and 3) a prospective

GOLF COURSE VALUATION SALES COMPARISON APPROACH

possessor will have to expend significant marketing and management resources to enhance the image and profitability of the courses with no certainty of achieving profitability.

The amount of discount for the possessory interest decreases as the length of the possessory time period increases (presuming possessory periods ending in 2038, 2048 and 2053). A longer possessory ownership period provides more financial flexibility to enhance performance and an extended payback period.

Assuming a possessory interest through September 1, 2038, I have applied a discount of approximately 10 percent to the fee simple value of Swenson, and a 20 percent discount to the fee simple value of Van Buskirk. Based on the other time periods of the possessory interests (other than a possessory interest perpetually), the following values are indicated (rounded):

Property	As of March 26, 2014 (1)	As of March 26, 2014 (2)	As of March 26, 2014 (3)
Swenson	\$1,750,000	\$1,800,000	\$1,850,000
Van Buskirk (Golf Course Only)	\$725,000	\$750,000	\$775,000

(1) Assumes possessory interest ends September 1, 2038

(2) Assumes possessory interest ends September 1, 2048

(3) Assumes possessory interest ends July 1, 2053

OAK PARK VALUATION SALES COMPARISON APPROACH

Oak Park offers a unique mix of improvements for community/public use that include 11 tennis courts, 2 regulation softball fields, a 6,000 seat regulation professional minor league baseball field, a multi-use field, a community swimming pool complex with changing facilities, a 33,165 square foot ice rink facility and an approximately 5,000 square foot, one-story senior center. Most of the improvements that exist on the Oak Park site – baseball Stadium, baseball/softball fields, tennis courts, a swimming pool complex and senior center - have minimal value as they are older and in need of significant repairs and maintenance. Additionally, the improvements are very specialized and have limitations created by the possessory interest.

Although most of the improvements at Oak Park have minimal value, they have historically shown the ability to generate some revenue as seen in the financial summary below. With some capital improvements to enhance appeal and lower costs, revenue enhancement possibilities exist.

REVENUE	2009-10	2010-11	2011-12	2012-13	% of Total Revenue
Oak Park Senior Center					
<i>Classes</i>	\$3,507	\$3,095	\$5,764	\$5,344	1.0%
<i>Facility Rentals</i>	10,006	10,288	13,477	12,256	2.5%
<i>Memberships</i>	11,972	11,943	12,958	12,573	2.7%
Oak Park					
<i>Facility Rentals</i>	24,381	24,404	22,830	19,697	5.1%
<i>Instructional Classes</i>	900	-	-	-	
Oak Park Swimming Pool	13,828	-	-	-	
Oak Park Ice Arena	375,558	363,599	358,926	425,962	84.3%
Oak Park Ball Fields	12,094	5,031	630	836	1.0%
Oak Park Tennis Center	11,657	10,962	13,157	10,419	2.6%
Total Revenue	\$463,903	\$429,322	\$427,742	\$487,087	

Source: *The City of Stockton - Community Services - Recreation*

In my opinion, only the ice rink contributes material value to the property. Comparable sales were gathered from 2010 through 2013 for ice rinks throughout the country with similar types of improvements. Various factors were considered when comparable sales were selected, including location and city population, size of rink, age and condition of the facility and overall property size in acres. The following page summarizes the sales used.

OAK PARK VALUATION SALES COMPARISON APPROACH

Sale Date	Address	City	State	Zip Code	City Population	Sales Price	Size (SF)	Land (AC)	\$/SF	\$/Acre
2/13/2012	300 Bizzell Ave	Midwest City	OK	73110	54,371	\$435,000	18,000	1.67	\$24	\$260,479

Average						\$867,782	21,697	1.99	\$46	\$513,191

In many instances, properties with significant deferred maintenance and similar specialized improvements were acquired and subsequently razed to permit other uses. In such cases, the properties sold for a significant discount, essentially land value, with little value given to the improvements. Given the level of deferred maintenance and specialized improvements found at the Oak Park ice rink, I believe the improvements would fall into the lower range of value when comparing to sales of similar properties.

Based on the comparable sales, the fee simple value of the ice rink at Oak Park is \$325,000 to \$500,000, or approximately \$10 to \$15 per square foot of rink improvements. I rounded this estimate to \$400,000. As previously noted, except for a perpetual possessory interest, the temporal possessory nature of the interest in Oak Park creates a substantial discount to fee value. Limitations created by the possessory interest restrict redevelopment possibilities. Additionally, it is possible that the on-going maintenance and capital expenditures needed to operate Oak Park could exceed any revenue producing abilities. As such, the possessory discount is significantly higher than that estimated for Swenson and Van Buskirk. I have discounted the fee value 40 percent (presuming a possessory interest through March 26, 2014). Based on other terms assumed for the possessory interest, my opinions are as follows:

OAK PARK VALUATION SALES COMPARISON APPROACH

Property	As of March 26, 2014 (1)	As of March 26, 2014 (2)	As of March 26, 2014 (3)
Oak Park	\$240,000	\$250,000	\$260,000

(1) Assumes possessory interest ends September 1, 2038

(2) Assumes possessory interest ends September 1, 2048

(3) Assumes possessory interest ends July 1, 2053

COMMUNITY CENTER VALUATION COST APPROACH

The Community Center at Van Buskirk serves the South Stockton Redevelopment Project Area. The 18,000 square foot facility opened in September 2007 after extensive renovations that include an indoor amphitheater, a climbing wall, a full gymnasium, a fitness facility, an arts and crafts room and two multipurpose rooms. The center offers, among other things, free after-school programs and care, arts and crafts programs, dance programs, subsidized or free meals and brown bag giveaways, health and safety screenings and classes. The center received the prestigious Award of Excellence in Design by the American Institute of Architects (AIA) in 2007.

In August 2006, a resolution of the Redevelopment Agency of the City approved the funding of \$3,700,000 from bond proceeds for the renovation of the Community Center at Van Buskirk. In March 2008, American Appraisal valued the reproduction cost of the Community Center at \$3,154,000.

I have estimated the replacement cost of the Community Center using the Marshall Valuation Service Guide ("MVS"), a national cost estimating service. The facility is characterized as a community center, Class C construction, of average quality. Based on the methodology described in the MVS, the calculation on the following page summarizes the replacement cost new of the Facility.

COMMUNITY CENTER VALUATION

COST APPROACH

Marshall Valuation Cost Calculation		Comments
Class C (Average Construction) - Aug 2013	\$120.59	Cost per SF
Van Buskirk Community Center Size	17,237	Square Footage
Base Cost - Aug 2013	\$2,078,610	
Current Cost Multiplier	1.02	To bring cost current
Base Cost - Feb 2014	\$2,120,182	
Add: Architect's Fee	\$148,413	
Base Cost & Architects Fees	\$2,268,595	
Local Multiplier - Stockton	1.19	To adjust for geographical location
Total Construction Cost	\$2,699,628	
Less: Depreciation - Deferred Maintenance	(\$100,000)	
Less: Depreciation - Physical Deterioration	(\$472,435)	Based on 40 year economic life and 7 years effective age
Depreciated Replacement Cost - Building Improvements	\$2,127,193	
Contributory Value of Site Improvements	\$50,000	Parking lot, 13 picnic tables, a tot lot, 2 tennis courts, 2 ball fields, 3 basketball courts, 4 handball courts, 5 barbecue pits, 2 restrooms
Total Depreciated Replacement Cost	\$2,177,193	

I have applied a discount to the total depreciated replacement cost value of the Community Center based on the different time periods of the possessory interests (other than a possessory interest perpetually). The following values are indicated (rounded):

Possessory Interest Discount	As of March 26, 2014 (1)	As of March 26, 2014 (2)	As of March 26, 2014 (3)
Total Depreciated Replacement Cost	\$2,177,193	\$2,177,193	\$2,177,193
Less: Possessory Interest Discount	22%	18%	15%
Value of Possessory Interest (Rounded)	\$1,700,000	\$1,775,000	\$1,850,000

(1) Assumes possessory interest ends September 1, 2038

(2) Assumes possessory interest ends September 1, 2048

(3) Assumes possessory interest ends July 1, 2053

VALUATION ASSUMING POSSESSORY INTEREST PERPETUALLY

A possessory interest perpetually is similar to fee ownership in a property. As such, the holder does not face the same challenges and constraints related to financing, redeveloping and changing the use of the Properties when specific ownership periods exist. The highest and best use of the Properties is different as if possession is perpetual than if time constrained. With perpetual possession, it is reasonably probable, physically possible and economically feasible that the improvements on the Properties would be demolished, and the land converted into residential, commercial or mixed-uses some time during the possessory period perpetually.

The value for the Properties with a possessory interest perpetually is land value. The existing improvements are considered to be interim uses until such time as a change of use can be achieved, and as market conditions dictate. I have used the sales of vacant land to estimate the Properties' value presuming a possessory interest perpetually.

Land sales were gathered for comparison purposes to the Properties. The size of the Properties - from 60 to over 200 acres - required that I search a broader area than the immediate Stockton area. As such, my sales database included those that were located along the I-5 corridor from Kern County to San Joaquin County. Sales that occurred from December 2012 to the present were gathered, and included land suitable for residential purposes. In total, over 500 sales were analyzed, of which 15 were deemed useful for comparison purposes due to their proximity to existing population or at the fringe of urban development and their size (in acres) that would allow larger scale residential/mixed residential commercial uses.

Over the past year and in the areas I researched and for the sales I selected, the overall sales volume was significant - over \$98 million. The sales most useful for comparison to the Properties indicated a range in selling prices per acre from \$10,145 to \$77,165, with an average price of \$27,000 per acre. Two of the sales considered were in San Joaquin County and were in excess of 100 acres. The first sale occurred in December 2012 for Tracy Hills for 2,204 acres for \$60,000,000 (\$27,223 per acre) with a specific development plan approved. The second sale occurred in October 2013 for Duck Creek Estates, an unimproved 114+ acre parcel that is located in Stockton a few miles east of Van Buskirk. That parcel sold for \$1,392,600 (\$12,210 per acre), and is comprised of non-contiguous parcels.

VALUATION ASSUMING POSSESSORY INTEREST PERPETUALLY

Considering the location of the Properties, their size, environs and development potential, I conclude the following values per acre, presuming perpetual possession:

Property	Site Size (Acres)	Value/Acre	Value (Rounded)
Swenson	218.6	\$35,000	\$7,650,000
Van Buskirk	194	\$15,000	\$2,900,000
Oak Park	61.2	\$30,000	\$1,835,000

The valuation of the Community Center assuming a possessory interest perpetually, is equal to the total depreciated replacement cost of the facility, without a deduction for the leasehold discount, plus land value.

Property	Total Depreciated Replacement Cost (Rounded)	Land Value (20 acres X \$15,000 per acre)	Value
Community Center	\$2,175,000	\$300,000	\$2,475,000

FINAL VALUE CONCLUSIONS

Based on the foregoing, and considering the appropriate valuation approaches applied, my valuation conclusions are as follows:

Property	As of March 26, 2014 (1)	As of March 26, 2014 (2)	As of March 26, 2014 (3)	As of March 26, 2014 (4)
Swenson	\$1,750,000	\$1,800,000	\$1,850,000	\$7,650,000
Van Buskirk*	\$2,425,000	\$2,525,000	\$2,625,000	\$5,375,000
Community Center	\$1,700,000	\$1,775,000	\$1,850,000	\$2,475,000
Oak Park	\$240,000	\$250,000	\$260,000	\$1,835,000

(1) Assumes possessory interest ends September 1, 2038

(2) Assumes possessory interest ends September 1, 2048

(3) Assumes possessory interest ends July 1, 2053

(4) Assumes possessory interest runs perpetually

* Includes golf course and Community Center

NATURE OF PAYMENTS UNDER LEASE AGREEMENT

Under the Lease Agreement, the “rent” payable by the City is equal to the amounts due in connection with the Bonds. I have considered whether that “rent” represented a fair market rent for the Properties and was related to the City’s use and occupancy of the Properties as of the execution of the Lease Agreement.

Salient aspects of the Lease Agreement are as follows:

- The Lease Agreement between the Authority and the City provides for the City to “sublease” the Properties back from the Authority for the purpose of enabling the City to finance various capital improvements throughout the geographic boundaries of the City.
- The Authority authorized the issuance of Bonds in the aggregate principal amount of \$35,080,000.
- The Lease Agreement commenced on September 1, 2009, and shall end on the earlier of September 1, 2038, or such earlier or later date on which the Bonds shall no longer be outstanding.
- “Rental” payments under the Lease Agreement are the amounts due and payable in respect of the Bonds.
- The Authority and the City “agree and determine” that the total payments under the Lease Agreement do not exceed the fair rental value of the Properties.

The City acknowledges that all such payments under the Lease Agreement have previously been assigned by the Authority to the Trustee in trust, for the benefit of the Owners of the Bonds, and the City consents to such assignment.

(1) Golf course forecast from KemperSports. Oak Park projection only includes the Ice rink forecast from SMG.

(2) No information provided.

(3) Oak Park financial information for 2008/09 was not provided.

(4) Total income does not include any lease payments between the Authority and City.

Using the combined financial information, I compared net operating results before and after contract “rent” called for under the Lease Agreement. Financial results for the year ending June 30, 2009, the year prior to commencement of the Lease Agreement, indicate the Properties sustained an operating loss of approximately \$361,000. When the Lease Agreement commenced on September 1, 2009, the Properties did not have the ability to cover any rent obligation, much less the multimillion dollar “rent” provided under the Lease Agreement.

NATURE OF PAYMENTS UNDER LEASE AGREEMENT

The blue line on the chart below represents the Properties' actual financial performance for the years ending June 30, 2009 through June 30, 2013 and a forecast for the year ending June 30, 2014. The red line represents the Properties financial performance with the contract "rent" obligation included.

The red line shows the dramatic impact of the added obligation of the Lease Agreement. To support the Lease Agreement "rent", revenues from the Properties would need to increase 2.4x the current levels, assuming that there was no commensurate increase in operating expenses. This dramatic increase in revenues is not achievable. Based on this information, it is readily apparent the Properties never had, nor were projected to have, the financial ability to pay the "rent" obligations under the Lease Agreement. The "rent" payable under the Lease Agreement was not in line or in no way related to the fair rental value (or the amount of rent that could have been paid) of the Properties or related to the City's use and occupancy of the Properties at the time the Lease Agreement was executed.

NATURE OF PAYMENTS UNDER LEASE AGREEMENT

I understand that the City contends that, at the time that the Lease Agreement was executed in 2009, “the rent payable thereunder was commensurate with the fair rental value *to the City* of continuing to operate the” Properties. The City notes that it periodically considers the value to its citizenry of the City’s services and facilities, “considering the cost of the services and the funds available to provide such services and facilities, determining which are essential or non-essential.” This assertion has no basis or relevancy for purposes of establishing “fair market rent”, as it is meaningless to any party other than the City. A normal fair market rent situation would involve a landlord that possesses real property that is marketable and in demand by third parties and whose rent would be determined by a free market exchange by third parties, all attempting to maximize their own positions. Under a market exchange, a landlord would not base its rent payable on whether the tenant could profitably, efficiently or economically operate the property.

If the tenant’s economic characteristics and ability to pay were assumed to be a relevant component of the rent determination, a very different Lease Agreement and leaseback agreement would have been written, economically and structurally, that would provide landlord additional economic benefits, as well as negative adjustments, over the term of the lease, based on various performance benchmarks as measured at different points in time. The Lease Agreement does not contain any of these key provisions that allow for rent adjustments up or down based on the tenant’s ability to pay.

Based on the above characteristics, the rent contained in the Lease Agreement was not a fair market rent at the time the agreement was executed in 2009.

APPRAISAL COMMENTS

An appraisal of certain of the City's real estate assets was performed by American Appraisal, dated June 3, 2008 (the "Appraisal Report"). The Appraisal Report included the Swenson, Van Buskirk and Oak Park properties and included only the reproduction cost new of the improvements. The date of valuation of the Appraisal Report was as of March 6, 2008. The Appraisal Report and the valuations expressed for the Subject Properties were cited in the Official Statement, more specifically on page 15. In that Official Statement, the Subject Properties were purported to have "market values" of \$8.6 million for Swenson; \$8.3 million for Van Buskirk; and \$19.4 million for Oak Park. The values used by the City and RBC specifically referenced the Appraisal Report. A footnote to the values in the Official Statement stated "based upon appraisals completed by American Appraisals, Inc. in June 2008."

I reviewed the Appraisal and the Official Statement. Clearly, the footnote contained in the Official Statement misstates and erroneously labels the valuations contained in the Appraisal Report as market values. The Appraisal Report does not purport to include "market values" of the assets; in fact, the Appraisal Report very clearly states that the purpose and function of the report is to express an opinion of the "cost of reproduction new of the subject assets for insurance placement and risk management (page 1 of the transmittal letter)." Page 3 of the Appraisal Report states "[t]he premise of value for the assets included in our report is cost of reproduction cost new for the identified real (exclusive of land) and personal property of City of Stockton, as of March 6, 2008." Page 4 of the Appraisal Report further states "In accordance with USPAP guidelines, all basic approaches to value were considered; however, because the purpose of our investigation was to express an opinion of the cost of reproduction cost new of the subject assets for insurance placement and risk management, it was considered appropriate to rely solely on the cost approach."

It is very clear that the Appraisal Report does not purport to express opinions of market value, but instead, clearly defines the values expressed for insurance purposes and no other purpose. The transmittal letter clearly states that ". . . this report is invalid if used for any other purpose (e.g. other than for insurance placement and risk management)."

Insurable value differs significantly from market value as defined and used in this report, as well as how market value is commonly understood by market participants. The cost of reproduction new as used throughout the Appraisal Report differs substantially from market value; reproduction cost new does not consider any depreciation (physical, functional or economic), nor is it tested against market transactions of similar properties. Furthermore, significant amounts of depreciation exist at the Properties.

APPRAISAL COMMENTS

In addition to using insurable values for the Property improvements from the Appraisal Report, the City added real estate land values to Swenson, Van Buskirk and Oak Park. The City's estimated land values appear to have been prepared by the City's property department and were based on values attributable to properties of less than one acre in size and with residential zoning. The Properties are well over 1 acre and are not zoned residential. The land values represented approximately one third of the total market value disclosed in the Official Statement, or \$11,744,708. To my knowledge, these land values were not reviewed by American Appraisal. The land values used by the City in the Official Statement reflect fee simple ownership. The additive aspect of land and the inconsistent methodology deployed further distorts and misstates the value of the Properties.

In their Official Statement, the City and RBC misstate and misuse the Appraisal Report, and mislead readers of the Official Statement to believe that independent market valuations have been performed on the properties by American Appraisal. Absent a review of the Appraisal Report and with reliance only on the Official Statement, a reader could easily be misled to believe that the market value of the Subject Properties had been independently derived and substantiated. Moreover, given the potentially limited nature of the possessory interests at issue, even use of a true market value of a fee simple interest in the Properties potentially would be misleading to purchasers of the Bonds.

In my opinion, the amounts and comments contained in the Official Statement should have not been relied on for underwriting purposes for the extension of credit or used in the sale of the Bonds. The Official Statement's use of the Appraisal Report's insurable values and the City's estimated land values is flawed, misleading and erroneous for any lending or extension of credit purpose.

ADMINISTRATIVE RENT

I have been asked to consider (a) the “contract rent” accrued under the Lease Agreement for the period from the bankruptcy petition date through June 30, 2014; and (b) the fair market rent for the Properties for that period.

Contract Rent

The amount of contract rent owed from June 28, 2012 through June 30, 2014 is \$5,374,020.

Bond Term

Total	\$4,849,019.93	\$525,000.00	\$5,374,019.93

Fair Market Rent

Based on my analysis of the Properties, I also have estimated the fair market rent for the Properties. I considered two approaches to determine fair market rent.

ADMINISTRATIVE RENT

Occupancy Cost Analysis

The occupancy cost ratio which is most commonly used in the retail industry to measure reasonable occupancy costs and to help determine the amount of rent a business can afford to pay. Occupancy costs typically range from between 8 to 12 percent of gross revenue. The differences in rate are driven by many factors including location and accessibility, competition in the local market, general condition of the improvements, signage and specific location within a property. For the purposes of this analysis, 10 percent of the 2012/13 gross revenues reflects the fair market rate for the Properties. The Community Center's gross revenue was not available for this analysis.

Property	Gross Revenue	Percent	Annual Rent
Swenson	\$1,170,185	10.00%	\$117,019
Van Buskirk	\$538,337	10.00%	\$53,834
Oak Park	\$487,087	10.00%	\$48,709
Total Rent			\$219,561

Present Value Analysis

Another method I used to estimate fair market rent is based on the calculation of the net present value of a market rental rate over the holding period. In this analysis, the net present value of the total rent payments should equal the value of possessory interest. Using certain assumptions and the estimated value, one is solving for the starting annual rent. Assumptions I used in this analysis include a discount rate of 8 percent and an annual rent increase of 2 percent. The annual increase is based on a historical (20 year) average CPI increase which is tracked by the Bureau of Labor Statistics. Below is a summary of my calculation.

Assumptions	Swenson	Van Buskirk	Community Center	Oak Park
<i>Value of Possessory Interest (1)</i>	\$1,750,000	\$725,000	\$1,700,000	\$240,000
<i>Annual Increases</i>	2%	2%	2%	2%
<i>Discount Rate</i>	8%	8%	8%	8%
<i>Starting Annual Rent</i>	\$138,000	\$57,180	\$133,920	\$18,900

(1) Assumes possessory interest ends September 1, 2038

Assumptions	Swenson	Van Buskirk	Community Center	Oak Park
<i>Value of Possessory Interest (2)</i>	\$1,800,000	\$750,000	\$1,775,000	\$250,000
<i>Annual Increases</i>	2%	2%	2%	2%
<i>Discount Rate</i>	8%	8%	8%	8%
<i>Starting Annual Rent</i>	\$124,800	\$52,020	\$123,120	\$17,280

(2) Assumes possessory interest ends September 1, 2048

ADMINISTRATIVE RENT

Assumptions	Swenson	Van Buskirk	Community Center	Oak Park
Value of Possessory Interest (3)	\$1,850,000	\$775,000	\$1,850,000	\$260,000
Annual Increases	2%	2%	2%	2%
Discount Rate	8%	8%	8%	8%
Starting Annual Rent	\$123,600	\$51,780	\$123,600	\$17,280

(3) Assumes possessory interest ends July 1, 2053

Reconciliation of Occupancy Cost and Present Value Analysis

Below is a summary of the occupancy cost and present value rent analysis. I will use the rounded average of the two methods.

Property	Occupancy Cost	Present Value - Possessory Interest Ending			Average Rent (Rounded)
		9/1/2038	9/1/2048	7/1/2053	
Swenson	\$117,019	\$138,000	\$124,800	\$123,600	\$126,000
Van Buskirk	\$53,834	\$57,180	\$52,020	\$51,780	\$54,000
Community Center	N/A	\$133,920	\$123,120	\$123,600	\$127,000
Oak Park	\$48,709	\$18,900	\$17,280	\$17,280	\$26,000
Total Rent	\$219,561	\$348,000	\$317,220	\$316,260	\$300,000

Administrative Rent – Perpetual Possession

In the case of the administrative rent payable under the presumption that possession is perpetual, the second approach, the present value analysis, was used. Since the possession period is perpetual, the discount rate is equal to the rent rate percentage. Therefore:

Property	Value	Annual Rent at 8% (Rounded)
Swenson	\$7,650,000	\$612,000
Van Buskirk	\$2,900,000	\$232,000
Community Center	\$2,475,000	\$198,000
Oak Park	\$1,835,000	\$147,000
Totals	\$14,860,000	\$1,189,000

ASSUMPTIONS AND LIMITING CONDITIONS

1. LIMIT OF LIABILITY

The liability of Atalon Management Group, LLC, is limited to the client only and to the fee actually received. Further, there is no obligation or liability to any third party. If this report is placed in the hands of anyone other than client, the client shall make such party aware of all limiting conditions and assumptions of the assignment and related discussions. The Appraiser is in no way to be responsible for any costs incurred to discover or correct any deficiencies of any type present in the property; physically, financially, and/or legally.

2. COPIES, PUBLICATION, DISTRIBUTION OF REPORT

Possession of this report or any copy thereof does not carry with it the right of publication, nor may it be used for other than its intended use; the physical report(s) remain the property of the Firm for the use of the client, the fee being for the analytical services only.

The Bylaws and Regulations of the Appraisal Institute require each Member and Candidate to control the use and distribution of each appraisal report signed by such Member or Candidate. Neither all nor any part of this appraisal report shall be disseminated to the general public by the use of advertising media, public relations, news, sales or other media for public communication without the prior written consent of the appraiser.

3. CONFIDENTIALITY

This report is to be used only in its entirety and no part is to be used without the whole report. All conclusions and opinions concerning the analysis as set forth in the report were prepared by the individual whose signature appear on this report.

4. INFORMATION USED

No responsibility is assumed for the accuracy of information furnished by work of or work by others, the client, his designee, or public records. The comparable data relied upon in this report has been confirmed with one or more parties familiar with the transaction or from affidavit or other source thought reasonable; all are considered appropriate for inclusion to the best of my factual judgment and knowledge.

ASSUMPTIONS AND LIMITING CONDITIONS

5. EXHIBITS

The sketches and maps in this report are included to assist the reader in visualizing the property and are not necessarily to scale. Various photos, if any, are included for the same purpose as of the date of the photos. Site plans are not surveys unless shown from separate surveyor.

6. LEGAL, ENGINEERING, FINANCIAL, STRUCTURAL, OR MECHANICAL NATURE HIDDEN COMPONENTS, SOIL

No responsibility is assumed for matters legal in character or nature, nor of any architectural, structural, mechanical, or engineering nature. No opinion is rendered as to the title, which is presumed to be good and merchantable. The property is appraised as if free and clear, unless otherwise stated in particular parts of the report.

The legal description is assumed to be correct as used in this report as furnished by the client, his designee, or as derived by the Appraiser.

No advice or opinion is given regarding the condition of or compliance with any governmental regulations affecting the: mechanical equipment, structural integrity or legality of the improvements, and soil/subsoil, drainage, capacity of utilities and other site conditions and constraints. I did not seek assistance from any qualified architect and/or engineer, nor did I seek any legal advice, research or opinions regarding liens, title status, or the legal marketability of such. Any lender, owner or stakeholder in the Properties should conduct a thorough property conditions report and any other studies with qualified professionals (i.e. mechanical or structural inspections by qualified and licensed engineers, architects, or other expert) before making any decisions regarding the Properties.

The Appraiser has inspected as far as possible, by observation, the land and the improvements; however, it was not possible to personally observe the conditions beneath the soil or hidden structural or other components. I have not critically inspected mechanical components within the improvements and no representations are made herein as to these matters unless specifically stated and considered in the report. The value estimate considers there being no such conditions that would cause a loss of value. The Appraiser does not warrant against the condition or occurrence of problems arising from soil conditions.

ASSUMPTIONS AND LIMITING CONDITIONS

The appraisal is based on there being no hidden, unapparent, or apparent conditions of the property site, subsoil, or structures or toxic materials which would render it more or less valuable. No responsibility is assumed for any such conditions or for any expertise or engineering to discover them. All mechanical components are assumed to be in operable condition and status standard for properties of the subject type. Conditions of heating, cooling, ventilating, electrical and plumbing equipment is considered to be commensurate with the condition of the balance of the improvements unless otherwise stated. No judgment may be made by us as to adequacy of insulation, type of insulation, or energy efficiency of the improvements or equipment which is assumed standard for subject age and type.

If the Appraiser has not been supplied with a termite inspection, survey or occupancy permit, no responsibility or representation is assumed or made for any costs associated with the obtaining same or for any deficiencies discovered before or after they are obtained. No representation or warranties are made concerning obtaining the above mentioned items.

The Appraiser assumes no responsibility for any costs or consequences arising due to the need, or the lack of need, for flood hazard insurance. An Agent for the Federal Flood Insurance Program should be contracted to determine the actual need for Flood Hazard Insurance.

7. LEGALITY OF USE

The appraisal is based on the premise that there is full compliance with all applicable federal, state and local environmental regulations and laws unless otherwise stated in the report; further, that all applicable zoning, building, use regulations and restrictions of all types have been complied with unless otherwise stated in the report; further, it is assumed that all required licenses, consents, permits or other legislative or administrative authority, local, state, federal and/or private entity or organization have been or can be obtained or renewed for any use considered in the value estimate.

8. DOLLAR VALUES, PURCHASING POWER

The market values estimated and the costs used are as of the date of the estimate of value. All dollar amounts are based on the purchasing power and price of the dollar as of the date of the value estimate.

ASSUMPTIONS AND LIMITING CONDITIONS

9. INCLUSIONS

Furnishings and equipment or personal property or business operations have been disregarded with only the real estate being considered in the value estimate.

10. VALUE CHANGE, DYNAMIC MARKET, INFLUENCEES, ALTERATION OF ESTIMATE BY APPRAISER

The estimated market values, which are defined in the report, are subject to change with market changes over time; value is highly related to exposure, time, promotional effort, terms, motivation, and conditions surrounding the offering. The value estimates consider the productivity and relative attractiveness of the property physically and economically in the marketplace.

The "Estimate of Market Value" in the appraisal report is not based in whole or in part upon the race, color or national origin of the present owners or occupants of the properties in the vicinity of the property appraised.

11. CONSIDERATION OF HAZARDOUS SUBSTANCES IN THE APPRAISAL PROCESS

Unless otherwise stated in this report, the existence of hazardous substances, including without limitation asbestos, polychlorinated biphenyl, petroleum leakage, or agricultural chemicals, which may or may not be present on the property, or other environmental conditions, were not called to the attention of nor did the appraiser become aware of such during the appraiser's inspection. The appraiser has no knowledge of the existence of such materials on or in the property unless otherwise stated. The appraiser, however, is not qualified to test such substances or conditions. If the presence of such substances such as asbestos, urea formaldehyde foam insulation or other hazardous substances or environmental conditions may affect the value of the property, the value estimated is predicated on the assumption that there is no such condition on or in the property or in such proximately thereto that it would cause a loss in value. No responsibility is assumed for such conditions, nor for any expertise or engineering knowledge required to discover them.

12. AMERICAN WITH DISABILITIES ACT

The Americans with Disabilities Act ("ADA") became effective January 26, 1992. I have not made specific compliance survey and analysis of this property to determine whether

ASSUMPTIONS AND LIMITING CONDITIONS

or not it is in conformity with the various detailed requirements of the ADA. It is possible that a compliance survey of the property, together with a detailed analysis of the requirements of the ADA, could reveal that the property is not in compliance with one or more of the requirements of the ACT. If so, this fact could have a negative effect upon the value of the property. Since I have no direct evidence relating to this issue, I did not consider possible noncompliance with the requirements of the ADA in estimating the value of the Property.
